

# **A MINI PROJET**

## **“FITNESS CLUB WEBS”**

**Under the guidance – Mr. Aman Chourasiya**

*- Submitted By*  
**Group Members - 1**  
**Vansh Tyagi, 12217197, KOC32**

## Technologies used

- **HTML** - HTML stands for Hyper Text Markup Language. HTML is the standard markup language for creating Web pages. HTML describes the structure of a Web page. HTML consists of a series of elements. HTML elements tell the browser how to display the content. HTML elements label pieces of content such as "this is a heading", "this is a paragraph", "this is a link", etc.
- **CSS** - CSS stands for Cascading Style Sheets. CSS describes how HTML elements are to be displayed on screen, paper, or in other media. CSS saves a lot of work. It can control the layout of multiple web pages all at once. External stylesheets are stored in CSS files.

# About project

**1. Fitness Club Website** – The website shows the website of a gym named “HUNK FITNESS” with the initial logo of a man doing deadlift in gym. This website involves the sign in menu, gym membership plans menu, along with the quick links provided.

**2. Objective of your Project** – The objectives of this project is to have a keen knowledge about the Technologies used i.e. HTML and CSS and implement them in your project making a productive and responsive website.
